Udemy Courses Analysis

Background:

This dataset contains 3.682 records of courses from 4 subjects (Business Finance, Graphic Design, Musical Instruments and Web Design) taken from Udemy.
Udemy is a massive online open course (MOOC) platform that offers both free and paid courses. Anybody can create a course, a business model by which allowed Udemy to have hundreds of thousands of courses.
This version modifies column names, removes empty columns and aggregates everything into a single csv file for ease of use.

Question/need:

- Most of the course are paid or free ?
- Does the course price affect subscribers count
- Does the course duration affect the price
- Does the course duration affects the subscribers count
- What Is the Most subscribers Course Category ?
- What is The Trends in Learning ?

Data Description:

❖ Kaggle Dataset   →   Udemy Courses
